

# AT-10 Whip Antenna

## Features

- A 1/4 wave single rod antenna features wideband, omnidirectional reception.
- Directly mounts on the receiver and paired with metal chassis to work as a dipole antenna.

## Specifications

Frequency Range	UHF 620 ~ 960 MHz
Antenna Gain	2.15 dBi
Connectors	TNC male
Impedance	50 $\Omega$
Note	Refer to the actual product in the event of product description discrepancy.
