

MP-8T Charger

Features

- Exclusively designed to charge the TA-80 transmitter.
- An intelligent single-slot charger that provides efficient and safe charging with constant voltage and current limiting, and a reverse polarity protection circuit to prevent charging errors.
- A red/green LED indicator that shows the charging status. The LED does not glow when no battery is detected.

Specifications

| | |
|---------------------|---|
| Input Voltage | DC 5 V / 1 A |
| Battery | 18500 Li-ion battery 3.7 V |
| Charge Current | Approx. 500 mA constant current. Terminated by 20% max. current |
| Current Consumption | 550 mA / 5 V |
| Note | Refer to the actual product in the event of product description discrepancy |
