

MP-8T Single-slot Charging Station

Features

- Exclusively designed to charge the TA-80 transmitter.
- An intelligent single-slot charging station that provides efficient and safe charging with constant voltage and current limiting, and a reverse polarity protection circuit to prevent charging errors.
- Red and green indicators show the charging status.

Specifications

Input Voltage	DC 5 V / 1 A
Battery	18500 Li-ion battery 3.7 V
Charge Current	Approx. 500 mA constant current. Terminated by 20% max. current
Current Consumption	550 mA / 5 V
