

User Guide

MP-800 Single Slot Transmitter Charging Station

MP-820 Dual Slot Transmitter Charging Station

Part Names

- | | |
|-------------------------------------|--|
| ❶ Screw Holes for Connecting Plates | ❺ Tenon for Multiple Charging Station Connection |
| ❷ DC Power Jack | ❻ Charging Indicator |
| ❸ Charging Slot for Bodypacks | ❼ Power Indicator |
| ❹ Charging Slot for Handhelds | ❽ Mortise for Multiple Charging Station Connection |

Operating Instructions

1. To connect to the DC power jack of the main chassis, push the DC output plug of the adaptor following the channel guide.

2. The power indicator **7** glows in green when the power supply is plugged in and works normally.
3. Insert the transmitters into the charging station in the correct direction.
4. Charging Indicator **6** : red light denotes charging; green light denotes full charge. No light when no transmitter is inserted.

5. Cautions:

- Be sure to use the designated MIPRO power supply to avoid inadequate voltage or current. Ensure input supply voltage does not exceed a specified value to avoid damage to the charging station, rechargeable batteries and transmitters. MIPRO's switching power supply has an output rating of 12 V / 0.5 A.
- Power off the charging station before charging.
- Do not use undesignated charging stations to avoid possible danger.
- The bodypack transmitter is not allowed to be inserted into the charging slot when the belt clip is upside down.

Compatible Models and Usage

1. Compatible Models

Handheld transmitters: ACT-800H/ACT-700H/ACT-500H/ACT-580H/ACT-240H

Bodypack transmitters: ACT-800T/ACT-700T/ACT-500T/ACT-580T/ACT-240T

2. MP-800 Usage

3. MP-820 Usage

Assembly of Multiple Charging Stations

1. Fitting tenon to mortise of another charging station, and using the connecting plate to connect two charging stations.

2. Fasten screws.

3. A dual charging station is complete.

4. Repeat the same step to assemble more charging stations.

5. To assemble multiple MP-800 charging stations, do likewise.

Note

Refer to the actual product in the event of product description discrepancy.

Dispose of any unusable devices or batteries responsibly and in accordance with any applicable regulations.

Disposing of used batteries with domestic waste is to be avoided!

Batteries / NiCad cells often contain heavy metals such as cadmium(Cd), mercury(Hg) and lead(Pb) that makes them unsuitable for disposal with domestic waste. You may return spent batteries/ accumulators free of charge to recycling centres or anywhere else batteries/accumulators are sold.

By doing so, you contribute to the conservation of our environment!
