

DANTE

Dante Interface Module

FEATURES

- Converts audio signal from ACT-800, ACT-700, and ACT-500 Series receivers into Dante network audio for low-latency, high-quality digital transmission.
- Builds audio networks via Cat.5e / Cat.6 cables and standard Ethernet switches, supporting large-scale multi-device integration.
- Enables simultaneous transmission of multiple audio channels over standard networks, carrying multiple streams on a single line.
- Compatible with Dante Controller software for audio routing and monitoring, enhancing system flexibility and integration.

SPECIFICATIONS

Supported Receivers	ACT-800 Series, ACT-700, ACT-500 Series
Interface	RJ-45 Ethernet (Cat.5e / Cat.6)
Network Requirements	Network Requirements: Standard Ethernet switch with DHCP, or an external DHCP server / WiFi router
Control Software	Dante Controller (refer to the Audinate official website)
