

MWC

MIPRO Wireless Console PC Interface Management Software

FEATURES

- MIPRO Wireless Console (MWC) is a new computer monitoring interface supporting ACT-800, ACT-700, ACT-600 and ACT-500 Series, simplifying multi-channel system management.
- Connects receivers to a computer via the MIPRO DVU adapter, managing up to 64 channels simultaneously with the ability to create, download, and store parameter profiles.
- Features a built-in spectrum analyzer with auto-scan to quickly plan interference-free frequencies while monitoring background noise and RF interference in real time.
- Clearly displays transmitter battery status, RF signal strength, audio output levels, and antenna A/B reception for comprehensive system monitoring.

SPECIFICATIONS

Supported Receivers	ACT-800, ACT-700, ACT-600, ACT-500 Series
Hardware Requirements	MIPRO DVU
Supported OS	Win 11 / Win 10 / Win 8, macOS 14.7 (supporting Apple M1 system)
Driver	DVU driver update: Download
