

ACT-32H

UHF Analog Handheld Transmitter

FEATURES

- UHF analog narrowband handheld transmitter for use with MIPRO's ACT-300 Series receivers and wireless PA systems, ideal for versatile applications.
- Ergonomic design with internal antenna and streamlined body provides a comfortable grip and minimalist aesthetic.
- High-rigidity multi-layer all-metal grille with removable upper grille and internally threaded lower grille for durability, pop protection, and clarity.
- Standard with MU-80 cardioid condenser capsule module; supports interchangeable MIPRO condenser or dynamic capsule modules.
- Upper housing includes LCD display showing channel and battery status.
- Incorporates MIPRO's exclusive ACT™ function for quick and precise frequency synchronization.
- Simplified battery compartment powered by AA batteries for quick and easy replacement.
- Lower housing includes a replaceable color-coded ID ring and built-in high-efficiency antenna for practical use.

SPECIFICATIONS

Frequency Range	UHF 480–934 MHz (country dependent)
Bandwidth	24 MHz
Display	Backlit LCD displays channel and battery status
Control Interface	ACT sync sensor
Mic. Capsule Modules	MU-80 condenser or other compatible capsule modules
RF Power Output	30 mW (country dependent)
Power Supply	2 × AA alkaline
Battery Charging	N/A
Dimensions	51 × 234 mm (Ø × L)
Weight	Approx. 250 g
