VM-10D

Double Bass Microphone Set

FEATURES

- Omnidirectional condenser capsule designed for double bass pickup, capturing deep resonance and tonal nuances.
- Flexible gooseneck with VH-10D clamp allows precise adjustment of angle and distance, ensuring secure positioning without damaging the instrument.
- Wide dynamic range supports up to 135 dB SPL, delivering detailed and natural sound.
- Works with MIPRO bodypack transmitters for wireless applications, or with MJ-53 adapter to XLR for 48 V phantom power.
